

# Tubo-M / Tubo-MZ

## Axial inline fans

### Use

- Supply and extract ventilation systems installed in various premises.
- Mounting in ventilation systems with low static pressure requiring high air capacity.
- Compatible with Ø 100 up to 315 mm round air ducts.

**Air flow:**  
up to 1700 m<sup>3</sup>/h  
472 l/s

**Power:**  
from 24 W

**Noise level:**  
from 33 dBA

### Design

- Compact steel casing covered with special polymer coating (**Tubo-M** series) or galvanized steel casing (**Tubo-MZ** series).
- Aluminium impeller.
- The fan is equipped with a power cord and external terminal block for connection to power mains.

### Motor

- Single-phase asynchronous external rotor motor with axial impeller.
- Equipped with ball bearings for longer service life.
- Integrated thermal protection with automatic restart.

### Speed control

- Step speed control with an external auto transformer (available upon separate order).

### Mounting

- Mounting in air duct or directly to the wall in any position with respect to air flow direction in the system.
- Power is supplied to the fan through an external terminal box with sealed electric lead-in.
- Wall or ceiling mounting with fixing brackets supplied as a standard.
- Polymer coated or galvanized steel reducers are provided for connection of the **Tubo-M** fans with Ø 150 up to 250 mm air ducts. The reducers are not included into delivery list and are available upon separate order.
- Tubo-M 315** and **Tubo-MZ 315** with Ø 315 mm air ducts have direct connection.

#### Designation key
